EDUCATION

Bachelor of Technology in Computer Science

Aug 2022 – May 2026

Centurion University

- CGPA: 8.1/10
- Relevant Coursework: Data Structures & Algorithms, DBMS, Operating Systems, Computer Networks, Web Development

Class 12th

Aug 2019 – Sep 2021

Academia International H S School Of Science

- Percentage: 62%

ACHIEVEMENTS

- Solved 150+ DSA problems on [LeetCode](#).
- Solved 300+ coding problems on [TakeUForward \(TUF\)](#).

PROJECTS

DevPilot – AI-Powered Web App Builder

May 2026 – Jul 2026

React.js, Node.js, TypeScript, MongoDB, WebContainers, Google Gemini AI

- Built a full-stack AI-powered application builder that converts natural-language prompts into complete, production-ready React and Node.js projects with live in-browser preview.
- Integrated Google Gemini 2.5 Flash as the primary LLM with Groq LLaMA 3.3 70B as automatic fallback, implementing a resilient AI routing layer that handles rate-limits and errors transparently.
- Engineered an in-browser Node.js runtime using the WebContainers API (WASM-based) to install dependencies, run dev servers, and render live previews — all without any backend infrastructure.
- Developed a custom XML parser to extract file artifacts and shell commands from AI responses, dynamically building a virtual file tree and mounting it into the WebContainer in real time.
- Built a VS Code–grade in-browser code editor using Monaco Editor with syntax highlighting, file explorer navigation, and language auto-detection for 8+ file types.
- Implemented secure authentication with JWT, bcrypt password hashing, and OTP-based password recovery via Nodemailer, with MongoDB for user and session management.

AI-Powered Job Application Tracker

2026

React.js, Node.js, Express.js, MongoDB, JWT, Claude API

- Built a full-stack job application tracking platform that helps users organize, monitor, and manage their job search pipeline end-to-end.
- Designed MongoDB schemas to model applications, companies, and status stages, and architected a RESTful API layer using Node.js and Express.js for CRUD operations across applications, notes, and status tracking.
- Implemented secure JWT-based authentication and authorization to manage user sessions and protect personal application data.
- Integrated the Claude API to power AI-assisted features such as application insights, follow-up suggestions, and resume/job-description matching.
- Developed a responsive React.js frontend with a structured component hierarchy for dashboards, application lists, and detail views, deployed on a free-tier stack — Vercel, Render, and MongoDB Atlas.

Clothify

Jul 2025 – Aug 2025

React.js, Node.js, Express.js, MongoDB, Stripe, Cloudinary

- Developed a full-stack e-commerce platform with separate user and admin dashboards for product and order management.
- Implemented JWT-based authentication, secure session handling, and role-based access control.
- Built shopping cart and order management functionalities with product size and quantity selection features.
- Integrated Stripe payment gateway and Cash on Delivery support for secure online transactions.
- Developed RESTful APIs using Node.js, Express.js, and MongoDB with Cloudinary integration for image uploads.

Wanderlust

Jan 2025 – Feb 2025

Node.js, Express.js, MongoDB, EJS

- Built a hotel listing platform with authentication and CRUD operations.
- Enabled users to create, update, delete, and explore accommodation listings.
- Added review and rating functionality for user feedback and listing management.

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, Python, Java, C/C++

Frontend: React.js, Next.js, HTML, CSS, Tailwind CSS

Backend: Node.js, Express.js, REST APIs

Databases: MongoDB, MySQL

DevOps & Tools: Docker, Kubernetes, Git, GitHub, CI/CD, AWS, Terraform

Other: WebRTC, WebSockets, Redux Toolkit

Deployment: Vercel, Render
