EDUCATION

B.Tech. in Computer Science & Engineering Aug 2022 – May 2026
Centurion University of Technology & Management
- CGPA: 8.1/10

Class 12th Aug 2019 – Sep 2021
Academia International H S School Of Science
- Percentage: 62%

ACHIEVEMENTS

- Solved 150+ DSA problems on LeetCode.
- Solved 300+ coding problems on TakeUForward (TUF).

PROJECTS

DevPilot – AI-Powered Web App Builder Live | GitHub | May 2026 – Jul 2026
React.js, Node.js, TypeScript, MongoDB, WebContainers, Google Gemini AI
- Built a full-stack AI-powered application builder that converts natural-language prompts into complete, production-ready React and Node.js projects with live in-browser preview.
- Integrated Google Gemini 2.5 Flash as the primary LLM with Groq LLaMA 3.3 70B as automatic fallback, implementing a resilient AI routing layer that handles rate-limits and errors transparently.
- Engineered an in-browser Node.js runtime using the WebContainers API (WASM-based) to install dependencies, run dev servers, and render live previews — all without any backend infrastructure.
- Developed a custom XML parser to extract file artifacts and shell commands from AI responses, dynamically building a virtual file tree and mounting it into the WebContainer in real time.
- Built a VS Code–grade in-browser code editor using Monaco Editor with syntax highlighting, file explorer navigation, and language auto-detection for 8+ file types.
- Implemented secure authentication with JWT, bcrypt password hashing, and OTP-based password recovery via Nodemailer, with MongoDB for user and session management.

HireFlow AI – AI-Powered Recruitment Platform Live | GitHub | Nov 2025 – Feb 2026
React.js, Node.js, Express.js, MongoDB, Cloudflare R2, SMTP
- Developed a full-stack recruitment platform to streamline job applications, recruiter workflows, and interview scheduling.
- Built role-based dashboards for recruiters and job seekers to manage job postings, candidate profiles, and applications.
- Designed and implemented RESTful APIs using Node.js and Express.js for authentication, job management, and application workflows.
- Integrated MongoDB for managing user accounts, job listings, candidate profiles, and application records.
- Integrated Cloudflare R2 for resume file storage and SMTP for automated interview notifications and application updates.
- Designed AI-driven recruitment features, including resume analysis, ATS scoring, smart job matching, and AI-powered interview preparation.

Clothify – Full-Stack E-Commerce Platform Live | GitHub | Jul 2025 – Aug 2025
React.js, Node.js, Express.js, MongoDB, Stripe, Cloudinary
- Developed a full-stack e-commerce platform with separate user and admin dashboards for product and order management.
- Implemented JWT-based authentication, secure session handling, and role-based access control.
- Built shopping cart and order management functionalities with product size and quantity selection features.
- Integrated Stripe payment gateway and Cash on Delivery support for secure online transactions.
- Developed RESTful APIs using Node.js, Express.js, and MongoDB with Cloudinary integration for image uploads.

Wanderlust Live | GitHub | Jan 2025 – Feb 2025
Node.js, Express.js, MongoDB, EJS
- Built a hotel listing platform with authentication and CRUD operations.
- Enabled users to create, update, delete, and explore accommodation listings.
- Added review and rating functionality for user feedback and listing management.

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, Python, Java, C/C++
Frontend: React.js, Next.js, HTML, CSS, Tailwind CSS
Backend: Node.js, Express.js, REST APIs
Databases: MongoDB, MySQL
DevOps & Tools: Docker, Kubernetes, Git, GitHub, CI/CD, AWS
Other: WebRTC, WebSockets, Redux Toolkit
Deployment: Vercel, Render
